

GoMowe storage instructions for spray gun

GoMowe's recommendations for storing the spray gun during extended periods of inactivity:

1. Begin by mechanically stirring the amount of grinding compound in the container.
2. Pour the stirred grinding compound back into the appropriate bottle.
3. Add an appropriate amount of food oil into the container and swirl it to coat the container walls with the grinding compound.
4. Operate the spray gun until it is empty. This ensures the spray gun is ready for use in the next season.

Best regards,
GoMowe ApS
